

ISMS Policy Statement

Gulf Researcher, whose business activities are related to on-demand and project-based research services including business research, market research, media monitoring, and investment research is committed to ensure security of its information assets and to protect them from all threats through maintaining their confidentiality, integrity, and availability, while abiding to business, legal, regulatory, statutory, and contractual requirements.

In accordance with the requirements of ISO 27001:2013, Gulf Researcher has established and implemented an Information Security Management System (ISMS), and established procedures to maintain and continually improve the system. Gulf Researcher has also established supporting policies and procedures for all applicable clauses and controls as per the Statement of Applicability (SOA) to express detailed response to the standard's requirements.

Gulf Researcher's top management are committed to:

- Protect the confidentiality, integrity, privacy of information and intellectual property of Gulf Researcher and its clients
- That information is made available to authorized people on need-to-know basis in a manner that does not compromise confidentiality, privacy, and integrity of information assets
- Ensuring that there is general security awareness throughout Gulf Researcher and providing suitable training to our staff, so that they are provided with current security knowledge, facts, and methodologies to ensure compliance to Gulf Researcher security policies within their functional areas
- Providing business continuity and availability through strong planning, contingency measures, and testing
- Minimizing loss and business disruption in the event of a security incident
- Providing Gulf Researcher with competitive differentiation, and global recognition by being ISO 27001 certified

Gulf Researcher shall ensure that the review of the Information Security Policy and related documents is performed at least annually or when significant changes occur to ensure continual improvement of the ISMS.
